Adjoiner
Solutions. Delivered.

WHO WE ARE

Adjoiner is your solutions partner. We tackle complex problems and deliver practical solutions.

Adjoiner, a unique SBA 8(a) certified company, was established in 2005 with the recognition that there is an immediate and ongoing need for a service company that can deliver technology-based solutions and consulting services highly focused on meeting the evolving issues clients face.

Today, Adjoiner is a one-stop shop for integrated solutions. We offer our clients the ability to customize their solutions

VALUES AND MISSION

At Adjoiner, these values drive our culture, strategy and approach. These core values also define who we are -- as people and as professionals.

- Focus on our competence
- Unwavering commitment to client's success
- Integrity in our approach
- Accountability with our performance

These core values determine our mission: To provide practical and reliable technology-based solutions consistent with client's objectives.

WHAT WE DO

We serve the Federal government and commercial entities who insist on simple and reliable mode of information delivery for competitive advantage.

Our integrated service offerings span the areas of customized security solutions, consulting services, systems integration, and strategic business process outsourcing to help clients manage the business and technology complexities of today's digital environment.

COMPETITIVE DISCRIMINATOR

Why should a potential client retain us?

- Highly-qualified personnel
- Solid past performance
- Corporate stability
- Current contract Holder

Going beyond the traditional narrow-focused, technical perspective, we focus on stakeholders' perspectives to construct a clear business case that will bring better results in meeting their goals. We work hard to understand our clients' unique requirements as well as the context and constraints that they are operating under. Tailoring solutions to meet the unique needs of each client is critical to our success.

PRODUCTS AND SERVICES

SECURITY

Our security solution is designed to expose potentially harmful events to prevent serious damage to business process and assets. We cater to a broad range of security objectives from highly sensitive DOD/Civilian agencies to the less sensitive private-sector.

- Intrusion Detection - To identify threats to physical environments and systems via deployment of Access Control Systems, Sensors (ICIDS), and Security Guards.
- Security Cameras & CCTV System - To quickly deploy a surveillance system for deterrence and audit capability for improving security policies. Wireless and night-vision cameras are our specialty.
- Visitor Management Solution (VMS) - Our VMS is a cost-effective system of implementing and managing (real time tracking) the transient nature of the visitors. Our VMS is networkable, scalable and expandable.
- Data Transmission Media - A significant element in an Electronic Security System (ESS) is the data transmission media (DTM), which carries information. Fiber is our specialty.

INFORMATION TECHNOLOGY

Federal agencies are under pressure to deliver high quality services with a shrinking budget. We can help federal agencies optimize business processes to generate more value.

- Application development (Legacy migration, COTS implementation, etc.)
- Enterprise Application Integration (EAI) to modernize, consolidate and coordinate the various computer applications in an enterprise.
- Project Management services that lead to results
- Web Enablement for sharing and extending your legacy applications with new users and applications

ELECTRICAL WORK

- Electrical Work – Various electrical works have been performed. These include electrical work for utilities and lighting in conjunction with residential /commercial building construction, low voltage electrical works for security systems, and electrical jobs and power supply for data centers.
- Renewable Energy - Energy Policy Act 2005 Public Law 109-58 requires federal agencies to increase the use of renewable energy while reducing energy consumption. We can help agencies to meet the 2030 net-zero-energy building requirement as mandated by Executive Order 13514, as well as increase the use of renewable energy as mandated by Executive Order 13423.

CONSTRUCTION

We perform construction work for commercial buildings and Military bases, including iron/steel work such as fences, gate installation, and concrete work.

- **Remodeling** - Building remodeling, repairing, and painting.
- **Concrete work** - such as concrete pavement and concrete footings.
- **Steel work** - Customized iron/steel structure work such as exterior fences, parking bumpers, and gates.
